## ZANZIBAR—VP

VP1ZR—D. Trinidad, Radio VPZ, Zanzibar.

**IMPORTANT**—Please remember that we must close our lists of calls several days in advance of publication date, in order to allow for printing, proof reading, and binding of the books. New stations should write us immediately upon being licensed.

We keep a list of new QRAs wanted always on hand. If you are working many foreign countries, or have schedules with them, ask W9FO for the latest list. You may be hearing the very stations we are looking for.

We wish to ask the help of all active radio operators in all parts of the world in correcting and adding new calls to our lists of amateur radio stations. We are already in touch with several of the national sections of the International Amateur Radio Union, some of which are included in the list appearing in this issue. If your country has an organized amateur group, we would appreciate the name of the organization, its address for mailing of QSL cards, and the address of the president or secretary. In countries not members of the I. A. R. U., we should like, wherever possible, the address of such a QSL Bureau, if one exists.

## Wanted—New Commercial Stations

Reliable information is wanted on new stations for inclusion in WHO'S WHO. If you do not know the frequency, give exact wavelength in metres and we will make the conversion here.

# High Frequency Press and Weather

W9FO will appreciate data on Press, Time, and Weather Schedules on frequencies above 3000 KC (below 100 metres). These are for the benefit of ships at sea, and the majority of these schedules are interrupted by a three-minute "silent period" at the 15th and 45th minute of each hour. At these times all ship operators are standing-by on 500 KC (600m) for SOS calls of ships in distress.

Note that time given is GMT (Greenwich Mean Time). U. S. Eastern Standard Time PLUS FIVE HOURS = GMT. BB = Major League Baseball Scores. CQ = General call, to all stations. Px = Press News. SX = Stock market quotations. If followed by a number, means only that number quoted. From New York Exchange unless otherwise stated.

Many thanks to operators of KUP, WNCI, and others for their help.

## HEAR MORE DX with TRIMM Featherweight Phones

4000 Ohm Featherweights are more sensitive to faint signals. Loud signals do not "Rattle" the cans and hurt your ears, so you can wear TRIMM FEATHERWEIGHTS right on your ears, instead of your cheeks. Weak stations, whether local or DX are accordingly *far more readable*. You will QSO more stations. Phone men will *understand more stations, too*, as the frequency response curve is flat.

## Ethics for the Serviceman?\*

**S**EVERAL thousand servicemen have recognized this to be one of the major problems requiring solution if their chosen occupation, radio servicing, is to be assured the status of a profession, respected and relied upon by the set-owning public.

Realizing this to be an undertaking of major proportions, that can not be achieved by single efforts, or by the efforts of any self-interested group, they have united in such manner as will best hasten the accomplishment of their objective.

Ultimate success can not be achieved, however, without the co-operation and support of the majority of our fellow workers. If you are interested in our program for the Profession of Radio Servicing, the executive secretary will gladly send complete information.

\*Ethics for the Serviceman is a code of business practice prepared by the Institute of Radio Servicemen, to best serve the interests of the radio serviceman.

State Laws Licensing and Regulating Radio Servicing is another important problem confronting servicemen. Do you want them? What can you do to safeguard your interests? Write to the executive secretary for complete information!
